

## **FREQUENTLY ASKED QUESTIONS – ENERGY AMBASSADORS PROGRAMME**

### **1. What is the Energy Ambassadors Programme (EAP)?**

The Energy Ambassadors Programme (EAP) was launched by the Energy Market Authority (EMA) in 2018 and aims to identify students with a keen interest in energy-related issues, as well as sustain their enthusiasm by involving them in sector-wide outreach events. This is part of EMA's effort to create and nurture a group of like-minded individuals who are enthusiastic and are interested in contributing to the energy sector.

### **2. What commitments are expected of Energy Ambassadors?**

Singaporean students who are appointed will serve as Energy Ambassadors for two years. Energy Ambassadors can look forward to participating in a series of outreach events which are organised to share with students on latest developments in the sector. These include events such as Youth@SIEW and Powering Lives Trails (learning journeys). In addition, Energy Ambassadors will be invited to attend training sessions conducted by EMA to deepen their understanding of the energy sector and kick-start potential energy projects based on their areas of interest.

Energy Ambassadors who participate in at least 5 outreach events during their two-year stint will receive Certificates of Participation to recognise their contributions. Energy Ambassadors may also initiate activities which are relevant to the scope of engaging their peers on energy-related issues, such as organising energy competitions or events within their schools. These will be considered as part of their participation for the programme.

### **3. If I am appointed as an Energy Ambassador, will there be training provided?**

Trainings and briefings will be provided to ensure that Energy Ambassadors are able to represent the sector and be well-equipped for the role.

### **4. How do I apply for the EAP?**

You may access the application form at <https://go.gov.sg/eap>. Please follow the instructions indicated and provide the relevant supporting documents together with your application.

### **5. When is the EAP application period?**

Applications are now open till 31 August 2021.

### **6. How and when will I be notified about the application outcome?**

Shortlisted applications will be notified via email by end September 2021.

### **7. I am a polytechnic student and my course of study is not in engineering. Can I still apply?**

Energy Ambassadors should preferably be/will be pursuing relevant engineering courses (e.g. electrical, mechanical). If you possess a strong passion for the energy sector, we will consider your application on a case-by-case basis.

**8. How does the EAP benefit me? Does this help with my job search or scholarship application in future?**

Through your participation in sectorial outreach events such as career fairs and industry talks, Energy Ambassadors will gain valuable exposure outside of classroom learning. The networking and learning opportunities would also be useful as you would be kept up to date of energy trends that may aid your future career and scholarship applications. The Certificate of Participation at the end of your two-year stint can also help to supplement and enhance your resume.
